PRESS RELEASE

Axolot Solutions signs an agreement with Sandahlsbolagen

Axolot has sold an AxoPur[®] system for the purification of contaminated water received and handled at the Sandahlsbolagen site in Värnamo. The system is expected to be delivered and commissioned within 3-4 months and will initially have a capacity of 8 000 m³ annually. It will however be prepared for doubling of the capacity. The agreement also includes a service agreement including regular exchange of reactors.

Sandahlsbolagen is a family-owned logistics company with 700 employees and a turnover of around 2 billion SEK. The company offers transport of goods on road and railway, contracting services and others. The company has a pronounced high ambition when it comes to sustainability and environment, which is illustrated by the fact that they now invest in an AxoPur system for the purification of contaminated water received and handled on behalf of their customers. The estimated order value is 1.3 MSEK.

“We appreciate the confidence that Sandahlsbolagen with their high environmental ambitions show us with this order for an AxoPur system. We will make sure that they are more than pleased with the installation. It is indeed very satisfying to see that the curiosity and interest in our unique and efficient technology is increasing day by day. We are only beginning our journey with a mission to actively contribute to a more sustainable world, where clean water is a very crucial factor, Axolot’s President Lennart Holm says in a comment.
